

DROP ARM AWNING FR 600

The FR600 combines a high quality finish with modern styling and suitable assembly that is extremely versatile. It is built entirely of corrosion resistant materials, making it the ideal answer for windows, verandahs and balconies. Screen mesh fabrics can minimize the heat and yet let the light through, decreasing the use of lights in the daytime. Reduce your energy footprint on the planet and consider screening your glass areas from the harsh effects of the sun.
