

BIOCLIMATIC PERGOLA B-CUBE URBAN

Max Width: 4,000 mm
Max Projection: 5,050 mm
Max Coverage on a Single System: 20 sqm

The 'Urban' is ideal in metropolitan settings. It has a robust hanging system, offering the perfect solution for minimalistic appearance and creating an outdoor space without the need for any posts. It gives a wonderful suspended look, while offering protection from seasonal variations, and brings style and functionality to your outdoor space. The fully automated bioclimatic aerofoil louvres can adjust the shading on your terrace when retracted.

When fully closed, the top area becomes totally water-resistant. A restrained gutter catches the rainwater and makes it drain directly in the vertical posts. Sidewall screens (optionally integrated), can keep out the cold and wind, making the space home-like.

Available Options: Sun Sensor | Wind Sensor | Balcony Glass & Glazing Systems | Aluminium Doors | Aluminium Windows
Linear LED Lighting System | Heat Insulated Aerofoil Louvres | Integrated Speaker Module Audio System
